### II. Verification of compliance - context and implementation

---

#### II.VII Checks planned and performed in the reporting period

The Enforcement of the EUTR, i.e. taking the effective, dissuasive and proportionate measures against the different duty-holders (operators, traders and monitoring organisations) is only possible, when compliance is verified by the authorities. For operators, the efficiency of compliance verification is supported by the risk based planning of checks. Information on the operators identified as fulfilling one or more risk criteria and thus being at risk of breaching the EUTR and the operators planned to be checked allows to appreciate the challenge faced in relation to the resources and expertise needed and available. The relationship of operators planned to be checked versus operators checked and checks performed informs on possible complications, which cannot be planned, such as substantiated concerns, issues with accessing the premises or documentation needed, or complications like the need to carry out scientific testing. The type of checks performed and the declared countries of origin and types or timber/timber products provide valuable additional information for a better understanding the size and complexity of the compliance verification task.

*The insertion of the number zero (0) in reply to any of the questions in this Tab requires an explanation in the Comment box.*

*For countries, which do not distinguish between operators placing domestic or imported timber on the market, '0' should be introduced in questions 1. and 2. and the combined numbers should be introduced under questions 3. and 4.*

\*12 For how many checks (check cases) were there any issues accessing premises or documentation?

0

13 How many checks (check cases) were purely desk-based?

This serves to estimate the workload involved.

70

14 How many checks (check cases) were both desk-based and onsite?

This serves to estimate the workload involved.

## Operators – imported timber/timber products

\*15 How many operators placing imported timber/timber products on the market were checked?

21

\*16 How many separate checks (check cases) does this correspond to?

One check (check case) may consist of multiple desk-based document reviews and several onsite visits, which may include multiple sample takings.

\*24 Did the Competent authority record, by check (check case), the declared country/countries of harvest/origin of the timber/timber products on which the check (check case) focused?

Yes  No

25 Please specify how many of the checks (check cases) primarily focused on one of the below declared countries of harvest/origin of timber/timber products:

The list contains the countries with which the EU concluded Voluntary Partnership Agreements and/or regarding which Competent authorities expressed a particular interest. It also provides 'other' for other single-country of harvest/origin products the check (check case) focused on, 'multiple focus countries' for checks focusing on several countries of harvest /origin (e.g. products of mixed origin), and 'no focus country/ies', where checks (check cases) did not focus on a specific country or countries
